

Environmental Management Policy

Penoyre & Prasad recognises that it has an impact on the environment through its office based activities and project designs as referred to in our practice plan.

Penoyre & Prasad's Environmental Management System to the Environmental Standard ISO 14001:2015 for the provision of architectural, master planning and design services.

We aim to take actions to reduce our impact on the environment by:

- Identifying, assessing and managing our internal and external issues, relevant interested parties and our environmental impacts of business operations and initiatives through an environmental management system
- Complying with all relevant environmental legislation and other requirements which relate to our environmental aspects as a minimum while encouraging clients to adopt more ambitious environmental targets
- Working creatively with our interested parties, including clients, consultants, contractors, suppliers and our staff to meet the agreed targets
- Increasing staff awareness and education, in respect of environmental matters, through the provision of appropriate information, training and recruitment
- Communicating, internally and externally, our environmental policy and our performance on a regular basis
- Monitoring the performance of completed projects and feeding back the findings into our new designs and to the building users

By meeting those objectives we aim to achieve the following outcomes:

- Continually aim to protect the environment including the prevention of pollution and sustainable resource use
- Continuous improvement of the environmental management system to enhance the environmental performance of our business operations and designs
- Delivery of low energy, low environmental impact buildings that are exemplars for the industry
- Delivery of long term, loose fit buildings that fully meet the current brief while also being easily adaptable for as yet unknown future uses
- Remain at the forefront of the industry as knowledge leaders in sustainable design and build upon our reputation for expert advice to clients on environmental matters
